

MISSION AND VALUES

- Being a client-oriented software development company Belitsoft is committed to providing high quality software products and services.

We have our own mission and values which help us to be a strong team capable of solving challenges every project may bring and deliver effective solutions to our clients.

Our Mission:

To delight our clients, employees by continuously providing quality service of developing and integrating software projects.

Our Values:

Client: This is the top value of our company. We should win the client's trust with our quality services. This is the main determiner of our work effectiveness.

Quality: Every employee of the company must keep high quality of his work.

Result: Every employee's ability to solve any problem independently, quickly and efficiently.

Discipline: Compliance with regulations, agreements and promises.

Moving ahead: Constant search for better solutions and new ideas and their responsible implementation.

Cool working place: Ability to make the company a place where people want to work.

These 6 determinants are the core of success both for our clients and for the company. That is what defines our values and tenets.
